Worldwide Voltage – shaver automatically adapts to an outlet voltage between 120V and 240V.

Instructions for Use

- Ensure your skin is free of oils.
- Wait at least 15 minutes after getting up before shaving, to ensure your face is free of puffiness that may be present from sleeping.
- Connect the shaver to the adapter and then to the power outlet.
- Switch the shaver on by sliding up the on/off switch.
- Always hold the shaver at a right angle to the skin so that the screens are touching the skin with equal pressure.
- Stretch skin with the free hand so hairs stand upright, making it easier for them to enter the cutting chamber.
- Use moderate to slow, circular stroking movement.
- The use of short, circular motions in stubborn areas may obtain a closer shave, especially along the neck and chin line.
- Do not press hard against the skin to avoid skin irritation and/or damage to the shaver head.

We recommend that you use your new shaver daily for up to four weeks to allow time for your hair and skin to become accustomed to the new shaving system.

Note: We recommend following these steps after each use.

1. Ensure the shaver is switched off and unplugged from the power outlet.
2. Open the shaver head (FIG A).

Inserting the Batteries

1. Make sure the trimmer is "OFF".
2. To open the battery compartment, slide the lower back panel off of the unit. (Figure A)
3. Insert two "AA" ALKALINE batteries, positive ends first. Make sure to match the battery positive symbols (+) to the positive symbols (+) on the unit. (Figure B)
4. Slide back panel onto the unit, making sure it snaps into place. (Figure C)

Use of any batteries other than alkaline will negatively affect the unit's operating performance. Batteries should not be left in the unit if the unit is not in use for long periods. To prevent battery corrosion the unit should be kept in a dry environment. Dead batteries should be removed immediately and disposed of properly. Do not use rechargeable batteries. The lower voltage in recharged batteries impairs the performance of the cutting unit.
